Here are just a few wireframes

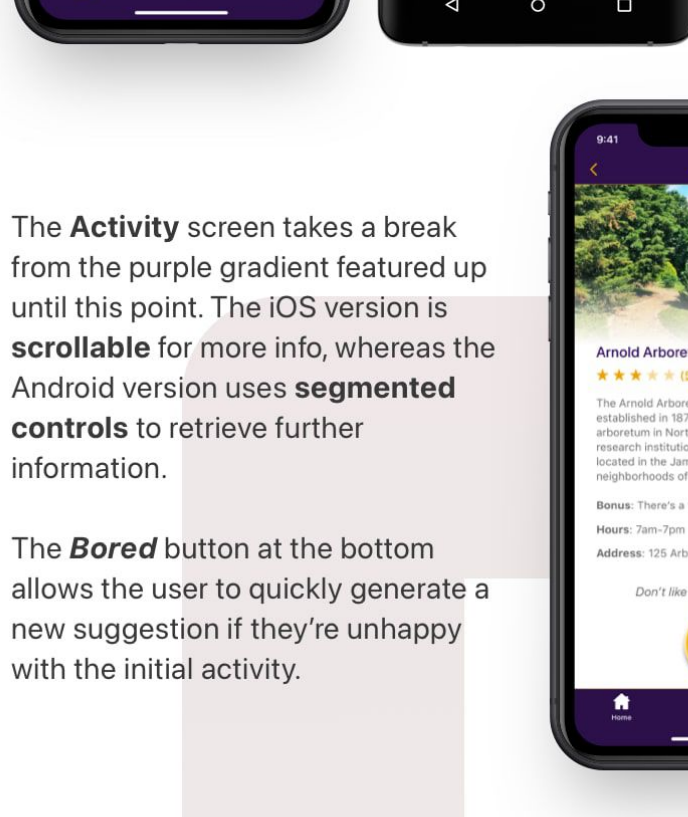

The **Splash** screens are ostensibly identical.

iOS on the left and Android on the right as will be seen with the following screens.

The **Home** screen adheres to each device's guidelines, playing off their strengths, such as the use of **radio buttons** on the Android screen.

The **Bored** button is prominent in

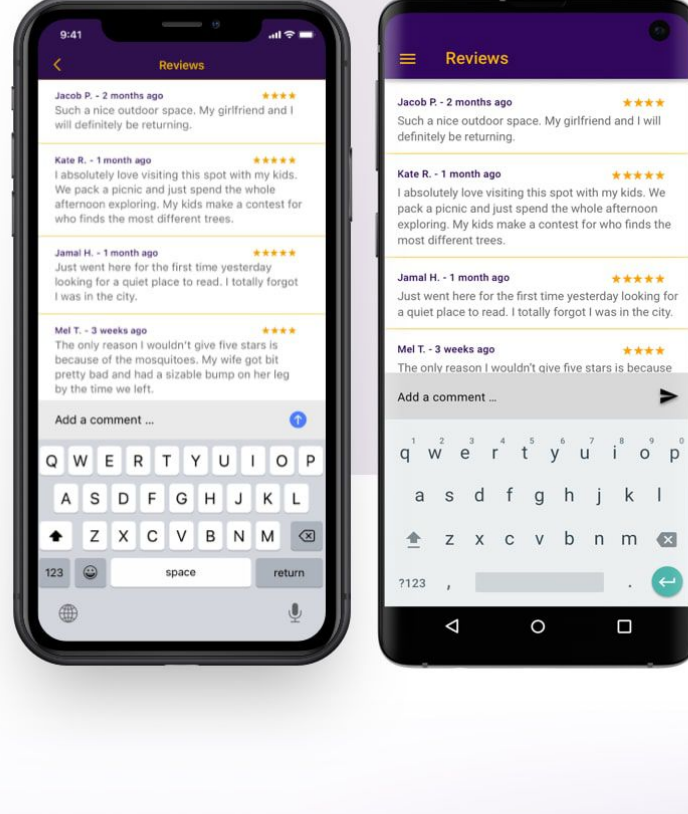

My Library uses a gradient into the image on iOS and Android places all the info within a card.

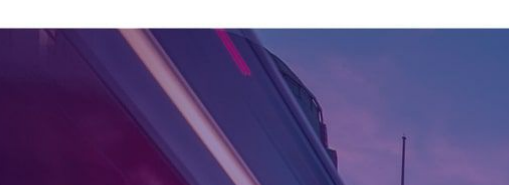

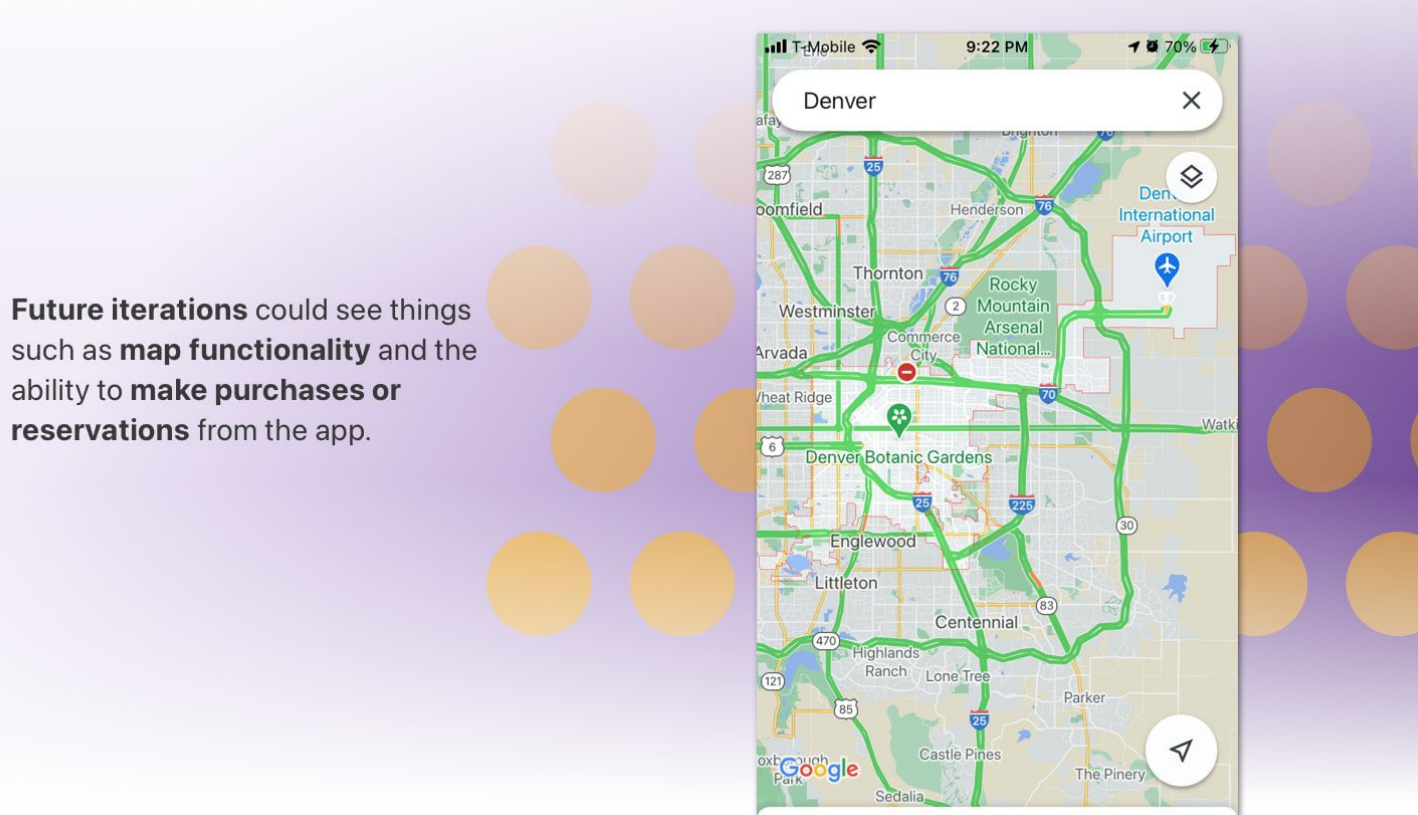

Both scroll horizontally for more activities and allow the user to **rate their past activities**.

Differences pointed out in earlier screens are clear here in the **Profile** and **Settings** screens, as well as the iOS version using rounder elements and Android using sharper elements with drop shadows.

The image shows two smartphones displaying the 'Lenny' app interface. The left phone displays the 'Profile' page, which includes a header with a hamburger menu icon and a magnifying glass icon. The profile information for 'Lenn Dobson' is shown, including age, location, and email. Below this is a section titled 'Interests' with a grid of tags: 'Music', 'Food', 'Shopping', 'Nature', 'Traveling', and 'Sports'. The right phone displays the 'Settings' page, which includes a header with a hamburger menu icon and a user profile icon. The settings options listed are: 'Profile', 'Privacy', 'Account', 'Notifications', 'Language', 'Theme', 'Security', 'Help', and 'Feedback'.

The **Reviews** screen is nearly identical in both versions. The use of a white background here is another break for the user from the gradient and
